

WHAT IS CORONARY ARTERY DISEASE?

CORONARY ARTERY DISEASE

Coronary artery disease (CAD), the most common type of heart disease, is a condition in which the arteries that supply blood to the heart become narrowed or blocked by a build-up of “plaque” (fatty deposits).

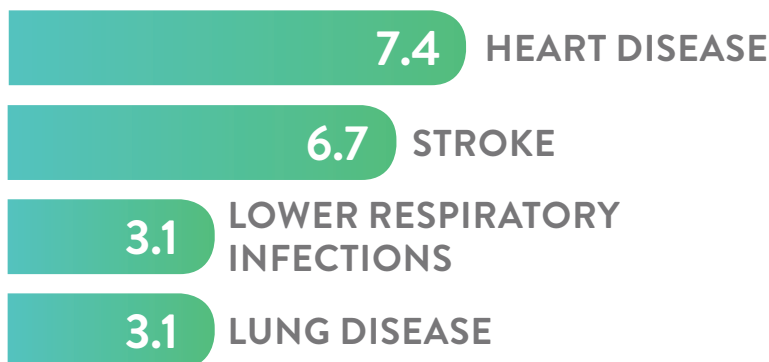

COMMON SIGNS & SYMPTOMS:

- > Chest pain
- > Shortness of breath
- > Pain in jaw or arms
- > Heartburn
- > Nausea
- > Vomiting
- > Heavy sweating

LEADING CAUSES OF DEATH IN THE WORLD¹

Number of deaths (in millions)

¹Source: The Top 10 Causes of Death, World Health Organization, Updated May 2014. <http://www.who.int/mediacentre/factsheets/fs310/en/index.html>. Heart disease defined as ischemic heart disease, stroke includes other cerebrovascular disease, lung disease defined as chronic obstructive pulmonary disease.
